

# INTEGRATIVE MEDICINE IN NEPHROLOGY AND ANDROLOGY

## Special Issue on Advances in Diabetic Nephropathy

### Background:

Diabetic nephropathy is one of the major microvascular complications of diabetes, which has a high incidence, and is the leading cause of end stage renal disease in chronic kidney disease patients worldwide. At present, diabetic nephropathy has become a serious public health problem that endangers human health.

### Information:

We welcome original research articles and review articles on the broad topic of diabetic nephropathy, including both clinical and basic research studies. We hope to provide an important resource for all physicians and scientists who wish to explore the topic of diabetic nephropathy.

Including but not limited to the following topics:

- Recent advances in the pathogenesis of diabetic nephropathy
- Pathological mechanism of diabetic nephropathy
- Chinese and western treatment of diabetic nephropathy
- Clinical experience of classic Chinese medicine recipes in treating diabetic nephropathy

Submissions should be made online via the Journal's submission site (<https://www.journal-imna.com/>).

Submitted manuscripts should not have been published anywhere, simultaneously submitted, or already accepted for publication elsewhere.

Manuscripts should be submitted by June 30.

For further details on the submission process, please see the Instructions for Authors.

### Guest Editor:

Prof. Cijiang He

Positions: Professor of Medicine and Pharmacological Sciences at Icahn School of Medicine at Mount Sinai.

Division chief of Nephrology at Mount Sinai Health System

Interests: glomerular cell biology and pathogenesis of diabetic kidney disease

Prof. Niansong Wang

Positions: Chief of Nephrology Department, Shanghai Jiaotong University Affiliated Sixth People's Hospital,

PhD Supervisor of Shanghai Jiaotong University

Interests: diabetic kidney disease
