

INTEGRATIVE MEDICINE IN NEPHROLOGY AND ANDROLOGY

Special Issue on Immunological and Metabolic Kidney Diseases

Background:

Increasing evidence shows that immunological and metabolic inflammation plays an important role in kidney diseases. Thus, we would like to publish a special issue on this topic.

Information:

We welcome original research articles and review articles on the broad topic related to immunological and metabolic kidney diseases, including both clinical and basic research. Through this special issue, we would like to provide new insights into the understanding of new mechanisms and novel therapies for immunological and metabolic kidney disorders. The Special Issue will include, but not limits to, the following topics:

- Recent advances in both basic and clinical treatment for immunological and metabolic kidney diseases
- New understanding of the mechanisms related to immunological and metabolic kidney diseases
- Effect of Traditional Chinese Medicines and its compounds on immunological and metabolic kidney diseases

Submissions should be made online via the Journal's submission site <https://www.editorialmanager.com/imna>. Submitted manuscripts should not have been published anywhere, simultaneously submitted, or already accepted for publication elsewhere.

Manuscripts should be submitted by **August 31, 2022**.

For further details on the submission process, please see the [Instructions for Authors](#).
